YOUR HISTORIES of NORTH OAKLAND

Sights, Sounds, & People from the Recent to the Deep Past

Hi, I used to be a researcher in the CHORI (Children's Hospital Oakland Research Institute). This was such a privilage to be there daily research in that historical building. Due to its past as a high school, we have very unique lab comparing to much more modern lab setting. Who would expect a full size chalk board in a biochemistry lab? This is also amazing to see how it was used as a setting for Hollywood movie, and continuously still a central part of the community for various event. I do hope that ppl can see how this building used to take care of the youngsters now as a senior center/resale building will continuously contribute to this neighborhood.

Thanks for making history!
